FORMBUTLER

JonokeMed™ Add-on Component.

Automatically Fill Official Forms

Filling out paper forms manually is laborious and time intensive. The FormButler™ gives you an electronic duplicate of the paper form on your screen, pre-filled with all the information that JonokeMed™ has for your patient. The FormButler™ makes completing forms simpler, more accurate and much quicker – saving you time and money. On average, your staff will spend a third of the time they use to spend completing forms and the accuracy of the information filled into the form increases exponentially with the reduction of required typing.

POWERFUL FORM FILLING

Jonoke's FormButler™ displays an on-screen form exactly as it appears when printed. All of the demographic information, and medical information that is stored in JonokeMed™ is quickly and accurately entered into the form, including:

- Exams,
- Lab Data and Results,
- Medications,
- Allergies,
- Diagnosis
- Past Obstetrical Information

and more are brought across, so you do not have to enter the information manually with each and every form.

For information that requires direct entry, use the keyboard to tab through each area and your mouse to click through check boxes, switch pages and scroll through the form.

THE PROCESS OF COMPLETING FORMS SIMPLIFIED.

SEE REVERSE FOR MORE FEATURES

the form in the patient's medical record, making it ready for quick and easy access any time it is needed. No need to print and file in a separate chart. No scanning into your system where it is then a graphic that cannot be edited. The FormButler™ allows forms to become an integrated feature within JonokeMed™. No other forms solution matches the ease of use and polish of Jonoke's FormButler™.

CREATE YOUR OWN

The FormButler™ also enables you to create your own clinic forms. You can recreate electronic forms to be used by the FormButler™ - freeing you to create forms as needed. Even the forms you create can fill in automatically with information from within JonokeMed™.

OFFICIAL FORMS

The FormButler™ gets you the industry leading J-Forms and any provincial and regional forms that are appropriate for your area. With check-boxes, shaded areas, graphs, calculations, draw boxes and graphics Jonoke's staff can complete the forms you require.

AUTOMATED UPDATES

It is a known fact that forms inevitably get updated and some change often. Traditionally with printed forms, you never knew if you had the most recent version. With JonokeMed™'s FormButler™, forms get updated automatically from Jonoke's server to your server with zero user interaction required. No matter what size your clinic is, or the number of sites you have, every user is now synchronized with the correct form version. The instant

the new form is saved, every user at every computer, will be using the new version. All previously created forms attached to

patients continue to be supported to ensure accurate data tracking.

COMPLETE AUDIT TRAIL

As you have come to expect with JonokeMed™, with the FormButler™ everything is audited. When a form is modified or printed, you will know who did it, when they did it, and from where they did it.

CROSS PLATFORM

Of course, every solution that Jonoke produces is cross platform. Therefore MacOS X and Windows' users have full use of the FormButler™ and J-Forms by Jonoke. As well, even remote filling of forms is available through the configuration of JonokeMed™.

PRINTING, FAXING, AND SAVING ELECTRONICALLY

JonokeMed™'s powerful features handle the recording of data in patient medical records, and enables you to send the information that needs to be sent to other organizations via forms. With Jonoke's FormButler™ the form's original layout is maintained ensuring it contains all necessary information. You can print the form out directly to your laser printer and if you have the FaxButler™, you can fax the form without printing a hardcopy.

With JonokeMed™'s paperless office, you to save the form for later use. Clicking on the save button saves
