RADIOLOGY CLINICS

Radiology Clinics & JonokeMed™

Meeting your Specialized Needs & Regional Requirements.

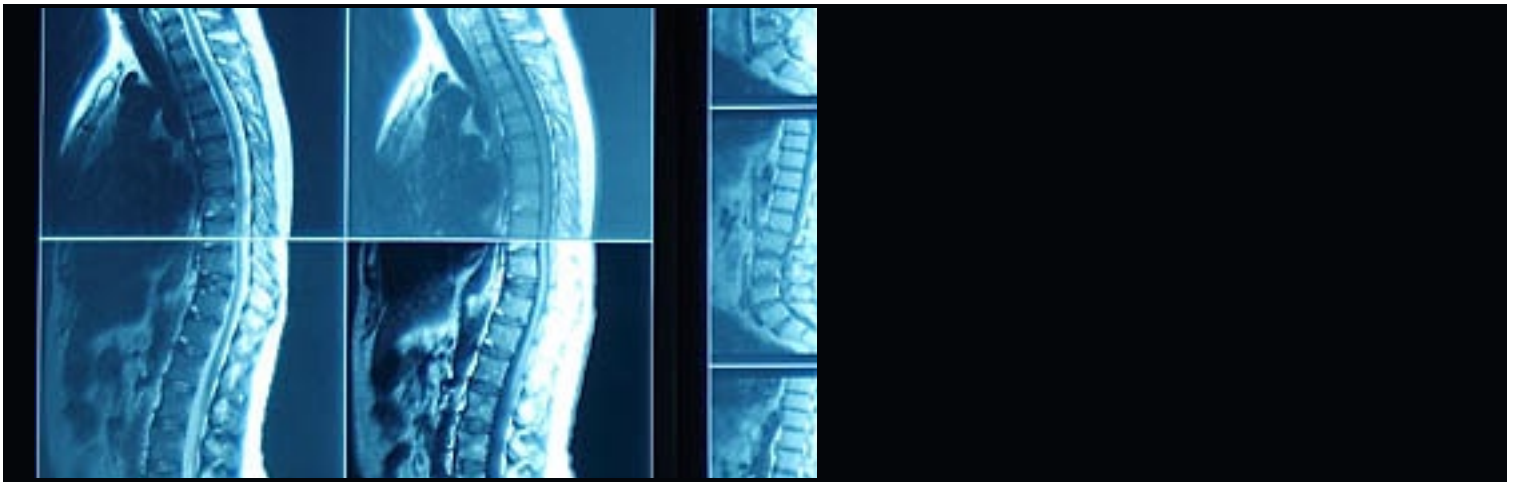

JonokeMed™ is a complete solution. No multiple re-entry of data, and no specialized expensive staff are required to manage and maintain it. In short, JonokeMed™ is inexpensive, and efficient. You get a single solution that not only makes everything digital, but actually improves work flow and patient care, while being less expensive than other solutions. Jonoke's JonokeMed™ enables small groups to affordably enter the digital age, thus improving their practice.

As a radiology clinic you have very specific needs that other physician offices do not have. You require more than just another scheduling and billing system with a word processor. You need a system designed for your work flow, that handles your data, and meets your regional needs. In the past, the traditional work-around has been to purchase multiple software programs in an attempt to integrate them into one operation. With JonokeMed™, you avoid the need to purchase multiple expensive programs that only regions and large groups can typically afford.

JonokeMed™ lets you concentrate on your medical tasks, and not on your computers!

JonokeMed™ tackles the tasks you need to accomplish -- improving work flow, efficiency & patient care.

YOUR TASKS

JonokeMed™ enables you to tackle the tasks you need to accomplish. Each task's challenges and needs can be handled, and then linked with all other tasks.

SCHEDULING

JonokeMed™ has a full featured scheduling system that can schedule up to 32,000 resources! From any location, you can schedule patients, rooms, instruments, and more. Each modality can have individualized scheduling or you can choose to have central scheduling or a combination of the two.

WEB

With Jonoke's WebButler™ option, you can now communicate between patients and health care professional, web schedule and have electronic referrals submitted directly to your clinic, without compromising patient privacy. This saves time; helps ensure consistent written referrals; and simplifies patient registration. JonokeMed™ provides your referring physicians and clinics the ability to connect with their own EMR system -- saving time.

FOR MORE INFORMATION

Contact Jonoke today to find out more about getting a JonokeMed™ system configured for your Radiology Clinic.

BILLING

JonokeMed's™ Billing for Radiology provides great time saving tools to make billing easy and accurate. In JonokeMed™, billing is integrated directly linking with scheduling, reading, word processing and patient encounters. Its proven ability to provide cross region billing helps your clinic submit their bills in a timely fashion, without having to hire a room full of staff.

DICTATION

Use Jonoke's J-Dictation™ for easy dictation of reports; flow of information to transcription; and quick turn around of your reports. No other solution in the industry lets you dictate so easily, while getting your reports out to referring doctors so quickly!

Transcriptionists will love the JonokeMed™ solution. It works like a traditional transcription device with added features. Transcription typing takes place right inside JonokeMed™, giving transcriptionists access to JonokeMed's™ full featured Medical Dictionary, ready-to-use templates, and time-saving glossaries. Additionally, because you are within JonokeMed™, you always have access to all records and the ability to place any of their content into your reports, without having to dictate or type it!

IMAGING

Capture and display images in the most efficient manner with JonokeMed™. Read multiple image formats using the built in JonokeMed™ tools or use the open source DICOM viewer solution OsiriX on MacOS X, or its sister program OsiriS for Windows.

THE COMPLETE SOLUTION

Become a Radiology Group with a 21st century complete EMR solution. Jonoke's JonokeMed™ will improve your work flow, your efficiency and your patient care, while being less expensive than other options.
